

# Gypsy Rose

## Test Strand & Patch Test Instructions

### Test Strand

#### What is the goal of a test strand?

Administering the product to a **small section of hair** before application allows you to assess the timing needed to get the desired colour result.

- 1** Mix 30ml of hot water with 1 teaspoon of colour powder.
- 2** Allow mixture to cool for 4-5 minutes, then apply on hair at the nape of the neck.
- 3** Leave product in for **15 minutes min** to **120 minutes max**. Check colour depth every 10 minutes by wiping off colour with cotton wool.

*Longer duration will provide **darker** and **richer** colour.*

### Patch Test

#### What is the goal of a patch test?

Administering the product to a **patch of skin** before application allows you to ensure no irritation or adverse reaction occurs when using the product.

- 1** Apply a small amount of the dye solution to the skin behind the ear or on the inner elbow.
- 2** Allow the product to dry. Check area frequently for skin irritation over 48 hour period.

***Do not** use product if irritation occurs or if you feel unwell.*
